# Conference and Presenter Unit **BROCHURE** 2020

[www.avtechnologies.co.uk](http://www.avtechnologies.co.uk)

# Our Products

Our conference and presenter units put all the audio-visual equipment you will need for any application in one convenient product. Whether you are making an important video call or presentation, our units make this easy.

## Hardware

With modular technology, we can build units to your exact needs and specifications, regardless of your application. All the required AV equipment will fit discreetly within the 9cm deep framework, with minimal visual impact.

## Software

Compatible with all software-based collaboration platforms, the unit is designed to be driven by a compact PC, that will fit inside the front storage shelf. External HDMI inputs are included for connecting laptops and other devices.

## Peace of Mind

In addition to the manufacturer's warranty on the installed AV products, each unit comes with a comprehensive 3-year warranty on the frame and panelling.

# Standard Features

The Conference and Presenter Unit includes the following as standard:

- \* High-Quality Amp and Speakers
- \* Commercial Hospitality-Grade Display
- \* Front and Rear Laminate Board in any Colour
- \* Front Shelf with Integrated Power and Connectivity
- \* Anodised Black Aluminium Construction

## Available with 40", 49" or 65" Display

The Conference and Presenter Unit is available in many different colours and finishes, with a variety of display sizes and other optional extras to meet the demands of your environment.

49" Mobile Version

Choose between a mobile trolley or wall-mounted unit. Each configuration is available with either 40", 49" or 65" hospitality-grade display.

## The Mobile Trolley

Our unique mobile unit fits through a standard door opening giving you the flexibility to relocate your AV system to any location within the building, with nothing more than one power cable to plug in. The AV for your meeting will be set up and ready to go within minutes.

## Also available as a Fixed Wall-Mounted Unit

With all integration of AV products carried out off-site prior to installation, the fixed unit can be installed onto any wall in any room. Integrated legs support the weight of the unit, which is then secured to the wall. This is much quicker to install compared with conventional AV systems, reducing disruption to your meeting room schedule and saving money on system configuration and installation costs.

## Contact Us Now for Friendly, Expert Advice

AV Technologies will assist you with your AV projects from the initial consultancy and system design stage, through to the sales, integration and installation of AV equipment at your customer's site.
