

Live Streaming Services

AV Xpert provides professional live streaming services for many occasions from awards ceremonies and conferences to weddings and funerals.

Live streaming offers an excellent way to bring people closer together and share in important events, particularly when usual participant numbers are limited due to government restrictions.

Live streaming your event will enable remote participants to feel part of the occasion by experiencing it live as it is happening. A copy will be kept so that it can be viewed later as a recording for anyone who is unavailable to join at the time of broadcast.

We have base packages available for small events starting from £195+VAT for equipment hire plus additional technician fee.

These include a single fixed 4K camera angle, live stream set up to YouTube, Facebook or Twitch and superb quality microphones to capture the audio.

For larger scale events and conferences, we can incorporate multiple camera angles, presentation feeds, multiple audio sources, live vision mixing and a full AV Support Service and Technical Event Production Service.

Our experienced team of technicians and project managers are able to assist with all of your live event requirements. Please contact us today for more information, or to arrange a free no-obligation consultation.
