

Video Conferencing Solutions for Business

Customisable video conferencing and collaboration systems. Fully integrated, pre-configured solutions ready to go now.

Designed and manufactured in the UK, our stylish video conferencing solutions are perfect for businesses to communicate with subsidiaries, remote workers and customers.

Use for presentations and collaboration in small and medium-sized boardrooms or meeting spaces.

Key Benefits

- Wall-mounted or portable options
- Works with all popular video conferencing platforms including Microsoft Teams, Google Hangouts and Zoom Conferencing
- Modular design puts you in control of the AV equipment built into the solution, from choice of speakers to the size of your screen
- Arrives fully assembled and configured, no disruption to your rooms, just plug in and get started
- Sleek, high-quality design means your video conferencing solution will look at home in any corporate environment
- Experienced engineers with extensive knowledge of working with audio-visual equipment, software and IT infrastructure
- Our portable version can be moved to where it is needed with ease
- Save money – whether you choose the portable trolley or even a wall-mounted version, you will save on labour costs, fixtures, fittings and cabling versus a permanent installation

Popular Integrations

- 'Logitech Tap' Touchscreen controller for video conferencing meeting rooms
- USB dock for use with external laptops
- Integrated PC
- Push-button control system for on/off, switching sources and volume control
- Multiple webcam options from small fixed 1080p, to larger 4K PTZ cameras
- Wired or wireless desktop or ceiling mounted microphones for improved audio quality in larger rooms
- Optional front storage shelf
- Integrated battery pack plus charging system providing up to ten hours' use for a fully mobile and self-contained system

Bespoke Integrated Units

Our portable video conferencing solutions are based on modular technology so we can build a unit to your exact specification, whatever your room size or application. All of the required AV equipment fits discreetly within a sleek unit that requires no extensive installation and can be ready for use in minutes.
