

Video Conferencing and Collaboration Solutions for Education

Customisable video conferencing and collaboration systems.
Fully integrated, pre-configured solutions for in-classroom and
remote learning applications.

Designed and manufactured in the UK, our robust conferencing and collaboration solutions are perfect for use in schools, colleges and universities

Systems for student, teacher and research collaboration, management meetings or streaming live from the classroom

Key Benefits

- Wall-mounted or portable options
- Collaborate with up to 64 users connected to the system. Up to four teachers or students can share their screens to the system at any one time
- Compatible with all major operating systems and devices including iOS / Android smartphones, iPads, tablets, laptops and desktop PCs
- Works with all popular video conferencing platforms including Microsoft Teams, Google Hangouts and Zoom
- Modular design puts you in control of the AV equipment built into the solution, from choice of speakers to the size of your screen. Extra-large screens available for classroom environments
- The mobile version arrives fully assembled and configured - no disruption to your teaching rooms
- Practical, robust and easy to use, your video conferencing and collaboration solution will be at home in classroom and office environments
- Save money by reducing labour costs, fixtures, fittings and cabling versus a conventional installation

Popular Integrations

- Internal PC or integrated with Teaching Room PC
- Push-button control system for on/off, switching sources and volume control
- Multiple webcam options from small fixed 1080p, to larger 4K PTZ cameras
- Content cameras to capture whiteboards with "teacher ghosting"
- Wired or wireless desktop or ceiling-mounted microphones for improved audio quality in larger rooms
- 'Logitech Tap' Touchscreen controller for video conferencing meeting rooms
- USB dock for use with external laptops
- Optional front storage shelf
- Optional integrated battery pack plus charging system providing up to ten hours' use for a fully mobile and self-contained system

Bespoke Integrated Units

Our portable video conferencing solutions are based on modular technology so we can build a unit to your exact specification, whatever your room size or application. All of the required AV equipment fits discreetly within a sleek unit that requires no extensive installation and can be ready for use in minutes.
